Research with us

WEDC does research that matters, driven by the need to understand what leads to effective and sustainable solutions in water and sanitation, and to contribute to the uptake of proven innovation and good practice.

Our work ranges from studies of specific technical problems to those which integrate multi-disciplinary perspectives: social, health, technical, economic, financial, institutional and environmental.

Let us help you to develop feasible solutions to your problems in water and sanitation. Whether you are concerned with the urgency of emergency situations or with long-term, sustainable development, we have the expertise and experience to take your projects and programmes forward.

“WEDC provides outstanding support for developing countries and is internationally recognised as a leader in providing sustainable infrastructure. Its partnerships with universities, aid agencies, non-governmental organisations and governments transcend academic, institutional and cultural boundaries in pursuit of improving the quality of life for those most in need.”
