Acknowledgements

This book is the outcome of action research undertaken in Mombasa (Kenya), Kampala (Uganda), Guntur (India) and Lusaka (Zambia) to develop a means to improve consultation between water utilities and the urban poor. The result of the fieldwork is an approach called PREPP.

Many people helped to shape PREPP and the authors acknowledge the willingness and constructive inputs of people who have participated along the way. These people include low-income consumers in the informal settlements and slums of Mombasa, Kampala, Guntur and Lusaka; utility and municipal managers, officers and engineers, community facilitators and NGO staff.

The authors also extend thanks to WEDC staff and postgraduate students who have contributed the benefit of their experience. The financial support of the Department for International Development, UK is gratefully acknowledged.
