Section 1 INTRODUCTION	13
1.1 Why this handbook	13
1.1.1 Using the handbook	13
1.2 SCF and drought in Ethiopia	14
1.2.1 Nutrition surveillance in Wollo	14
1.2.2 Feeding programmes	15
1.2.3 Hareghe under drought	16
1.3 Useful references	17
Section 2 THE ADMINISTRATIVE FRAMEWORK	18
2.1 Administrative levels	18
2.2 Information and planning	18
2.3 Drought relief structure	19
2.4 Your own structure	19
2.5 Local liaison	19
2.6 NGO liaison	19
2.7 Security	20
2.8 Calendars and time	20
Section 3 FOOD AND FEEDING - DECIDING WHAT TO DO	21
3.1 Where?	21
3.2 Who and how many?	21
3.2.1 Local information & requests	21
3.2.2 The thinnest	21
3.2.3 What measure?	22
3.2.4 Weight for length (WFL)	22
3.2.5 Age-based measurements — for babies	23
3.2.6 Standards & cut-off points	23
3.2.7 Assessing thinness	24
3.2.8 Measuring techniques	27
3.2.9 A note on SCF weight for height charts	27
3.2.10 Rough screening — by (MUAC) & surveys by — (WFL)	28

3.2.11	Records, analysis & reports	30
3.3	Food use and local context	31
3.4	Dry ration distribution	31
3.4.1	Basic rations first	31
3.4.2	Whose responsibility?	31
3.4.3	Types of food	33
3.4.4	Quantities of food	33
3.4.5	Decentralised delivery	35
3.4.6	Distribution system	35
3.4.7	Milling	36
3.5	The vulnerable groups	36
3.5.1	Special requirements	37
3.5.2	Priorities	37
3.5.3	Discharge levels	37
3.6	Dry supplements	38
3.6.1	Children below 80% WFL (group 1)	38
3.6.2	Pre-mixes	38
3.6.3	Other vulnerable groups (2,3,4,5)	39
3.6.4	Sharing	39
3.7	Wet/cooked feeding	40
3.7.1	Timing	40
3.7.2	Measured feeding vs. feeding "machine"	40
3.7.3	Full cooked feeding	41
3.7.4	Supplementary cooked feeding	42
3.8	Matching food supplies to needs	43
3.8.1	Types of food	43
3.8.2	When the quantity of supplies is known	43
3.8.3	When supplies are uncertain	44

Section 4 PLANNING A FEEDING PROGRAMME – SITE, PUBLIC HEALTH, STAFF AND SUPPLIES 45

4.1	The needs — food & public health first	45
4.1.1	Planning sequence	45
4.2	Local context	45
4.3	Food supplies	46
4.3.1	Preliminaries: taste, fasting, spices	46
4.3.2	Relief foods	47
4.3.3	Menu-making for cooked feeding	49
4.3.4	Basic food supplies for cooked feeding	50
4.3.5	Turning food supplies into meals	51
4.4	Notes on biscuits	52
4.4.1	When to use them	52

4.4.2	Which kind of biscuit	53
4.4.3	Serving biscuits	53
4.5	Site feasibility	53
4.5.1	Site inspection	53
4.5.2	Site prerequisites	53
4.5.3	Site size	54
4.5.4	Site layout	54
4.6	Water supply	58
4.6.1	Local knowledge	58
4.6.2	OXFAM	58
4.6.3	Water sources	58
4.6.4	Water requirements for feeding	59
4.6.5	Re-charge rates	60
4.6.6	Pumps	61
4.6.7	Wells	62
4.6.8	Town water supplies	62
4.6.9	Emergency supplies	62
4.6.10	Who pays the bills?	63
4.6.11	Safe drinking water	63
4.7	Transport & logistics	64
4.7.1	General	64
4.7.2	Calculating trucking requirements	65
4.7.3	Own transport	66
4.7.4	Maintenance & spares	66
4.7.5	Fuel	66
4.7.6	Importing	66
4.7.7	Government transport	67
4.7.8	Private commercial transport	67
4.8	Survey & feeding equipment & supplies	67
4.8.1	Start-up supplies	67
4.8.2	Regular supplies	68
4.8.3	Checklist	68
4.9	Fuel supplies	71
4.9.1	Vehicle fuel	71
4.9.2	Cooking fuel	71
4.10	Assessing health & local health resources	73
4.10.1	General considerations	73
4.10.2	Nutritional status (see 3.2)	74
4.10.3	Food supply & numbers in need (3.2 & 4.3)	74
4.10.4	Public health factors	74
4.10.5	Disease prevalence	74
4.10.6	Local health service & supplies	76

4.10.7	What to do and how to do it	76
4.10.8	Health staff	77
4.10.9	Notes on drug ordering	78
4.11	Essential public health measures	79
4.11.1	Water supply	79
4.11.2	Shelter	79
4.11.3	Sanitation (see 4.13)	80
4.11.4	Vector control table	80
4.11.5	Waste disposal (see 4.13)	81
4.11.6	Public health education	81
4.11.7	Mass health programmes	81
4.12	Drainage	83
4.12.1	Surface drainage	84
4.12.2	Ditches	84
4.12.3	Soakaways (see 4.13.4)	85
4.13	Sanitation & waste disposal	85
4.13.1	Site hygiene	85
4.13.2	Latrines	86
4.13.3	Water distribution & hand-washing	91
4.13.4	Soakaways	92
4.13.5	Kitchens & washing-up	92
4.13.6	Garbage disposal	93
4.13.7	Steaming & shaving	93
4.13.8	Spraying	95
4.13.9	Disposal of dead bodies	95
4.14	Road access	96
4.14.1	Local knowledge	96
4.14.2	Technical advice	96
4.14.3	New roads	97
4.14.4	Roadside drainage	97
4.14.5	Cross-road drainage	97
4.14.6	Roadstone	97
4.14.7	Equipment	97
4.14.8	Maintenance	98
4.15	Buildings	98
4.15.1	Siting	98
4.15.2	Space	99
4.15.3	Structure	100
4.15.4	Wind, rain, sun, fire	101
4.15.5	Materials	101
4.15.6	Tents	101
4.15.7	Feeding halls	101

4.16	Construction materials & equipment costs	102
4.16.1	Structural support	102
4.16.2	Roofing	102
4.16.3	Nails	102
4.16.4	Wall cladding	102
4.16.5	Stores & kitchens	103
4.16.6	Heavy equipment	103
4.16.7	Own equipment	103
4.16.8	Water parts & fittings	104
4.16.9	Stone	104
4.16.10	Cement	104
4.16.11	Drainage and water pipes	104
4.16.12	Plastic sheeting	105
4.16.13	Bamboo	105
4.17	Contracts, labour legislation	105
4.18	Staff	106
4.18.1	Construction staff	106
4.18.2	Feeding programme staff	107
4.18.3	Interpreters	109
4.18.4	Job descriptions	109
4.18.5	Staff training	109
4.19	Menus & recipes**	111
4.19.1	High energy milk (HEM)	111
4.19.2	High energy drink (HED)	112
4.19.3	Porridges	113
4.19.4	Breads, pancakes, kitta	113
4.20	Kitchen organisation	114
4.20.1	Stoves	114
4.20.2	Production line	114
4.21	Stores & stockkeeping	115
4.21.1	Stores & storage	115
4.21.2	Stockkeeping	116
4.21.3	Ordering	116
4.22	Planning summary	117
Section 5	FEEDING PROGRAMME MANAGEMENT**	118
5.1	Start-up	118
5.2	Screening	118
5.2.1	Checking agreements	118
5.2.2	Vouching	119
5.2.3	Children under 5	120
5.2.4	Pregnant and lactating women	120

5.2.5	Elderly, sick and malnourished adults	120
5.2.6	Checking estimates	120
5.3	Registration	120
5.3.1	Coordination	121
5.3.2	System	121
5.3.3	Registration details	121
5.3.4	Health check	123
5.3.5	Supervised intensive feeding	124
5.3.6	Intensive feeding	124
5.3.7	Supplementary feeding	125
5.3.8	Vitamin A	125
5.3.9	Rules for newcomers	125
5.3.10	De-lousing	126
5.3.11	Health education	126
5.4	Monitoring	126
5.4.1	Recording attendance	127
5.4.2	Weighing	129
5.4.3	Medical referrals	130
5.4.4	Length	130
5.4.5	Records	130
5.4.6	De-worming	130
5.4.7	Vitamin supplementation	131
5.4.8	Programme monitoring	131
5.5	Discharging	132
5.6	Hygiene	133
5.7	Mealtimes & organisation of feeding	133
5.7.1	Timing	133
5.7.2	Feeding routines	134
5.7.3	Unit production	135
5.7.4	Time-testing	136
5.7.5	Morning start-up	136
5.8	Rehydration	136
5.8.1	Testing for dehydration	137
5.8.2	Management	137
5.8.3	Rehydration before re-feeding	138
5.8.4	Oral rehydration solutions (ORS)	138
5.9	Marasmus	139
5.10	Oedema & kwashiorkor	141
5.10.1	Oedema	141
5.10.2	Kwashiorkor	141
5.10.3	Managing oedema	142
5.11	Other difficult feeders	143

5.11.1	Child refuses food	143
5.11.2	Mother of infant has no milk	144
5.11.3	Infant too weak to suckle	144
5.11.4	Suspected lactose intolerance	144
5.11.5	Intolerance of feeds	145
5.12	Checking	145
5.12.1	Recipe checking	145
5.12.2	Other checks	145
5.13	Reporting	146
5.14	Maintenance of site & basic services	148
Section 6	MEDICAL MANAGEMENT*	149
6.1	General	149
6.1.1	Food and prevention first	149
6.1.2	Planning	150
6.1.3	Screening	150
6.1.4	Staff training	151
6.1.5	Standardised regimens for prescribing	151
6.1.6	Drugs	151
6.1.7	Management and treatment	152
6.2	Protein-energy malnutrition	152
6.2.1	Marasmus — clinical signs	152
6.2.2	Kwashiorkor — clinical signs	152
6.2.3	Notes on oedema	152
6.2.4	Complications of PEM	153
6.2.5	Management of PEM	153
6.3	Diarrhoeal diseases	153
6.3.1	Dehydration	154
6.3.2	Drugs	154
6.3.3	Management of diarrhoea without blood	154
6.3.4	Severe dehydration	154
6.3.5	IP reminders	156
6.3.6	NG reminders	156
6.3.7	IV reminders	156
6.3.8	Fluid replacement solutions	157
6.3.9	Indications for drug treatment	157
6.3.10	Diarrhoea with blood	157
6.3.11	Preventive measures	158
6.3.12	Specific diarrhoeas in Ethiopia	158
6.3.13	Severe diarrhoea & vomiting = cholera	158
6.3.14	Setting up an isolation area	161

6.4	Worms	162
6.4.1	Incidence	162
6.4.2	Symptoms	162
6.4.3	Treatment for ascaris	162
6.4.4	Treatment for hook/thread/pin/tapeworm	163
6.4.5	Prevention	163
6.5	Anaemia	163
6.5.1	Causes	163
6.5.2	Treatment	163
6.6	Measles	164
6.6.1	Treatment	164
6.7	Malaria	164
6.7.1	Distribution	164
6.7.2	Treating malaria	164
6.7.3	Prevention of malaria	165
6.8	Eye diseases	166
6.8.1	Vitamin A deficiency	166
6.8.2	Trachoma	166
6.8.3	Conjunctivitis	167
6.9	Respiratory tract infections	167
6.9.1	Incidence	167
6.9.2	Treatment	167
6.10	Tuberculosis	168
6.10.1	Diagnosis	168
6.10.2	Treatment	168
6.11	Pertussis (Whooping cough)	169
6.12	Meningitis	169
6.13	Louse-borne diseases	169
6.13.1	Typhus	170
6.13.2	Relapsing fever	170
6.14	Skin diseases	170
6.14.1	Scabies	170
6.14.2	Impetigo	171
6.14.3	Ringworm	171
6.14.4	Prevention	171
6.15	Common problems in malnourished children	171
6.15.1	Unexplained weight loss without TB	171
6.15.2	Persistent diarrhoea	172
6.15.3	Hypoglycaemia	172
6.15.4	The collapsed child	172
6.15.5	Hypothermia	172
6.15.6	Septicaemia	172

6.16	Reporting health information	172
6.17	Drug dosage chart	173
Section 7	CLOSING THE CENTRE AND ENDING DROUGHT FEEDING	174
7.1	Dependency and development	174
7.2	Helping people to leave the feeding programme	174
7.3	Help to self-help	175
7.4	Timing	175
7.4.1	Food and nutritional status	175
7.4.2	Rain and food production	175
7.4.3	Phasing out	175
Section 8	APPENDICES	176
8.1	Abbreviations	176
8.2	Making a length-board	177
8.3	Mid upper arm circumference (MUAC)	179
8.4	Weighing	180
8.5	Measuring length/height	181
8.6	WFL table	183
8.7	WFA table	184
8.8	Table of normal growth rates	184
8.9	Calculations	184
8.10	Very basic nutrition for emergency workers	185
8.10.1	Water	185
8.10.2	Energy	185
8.10.3	Protein	186
8.10.4	Vitamins & minerals	186
